That is the easiest way to make customers for your business. Converting contacts is one of the most important tools to carry out your business successfully. Even though many businesses keep a list of contacts, they don't use it as a tool for traffic, but to trace the details of the customers they have. What is SoftFuse? The SoftFuse is a great tool to convert contacts you already have into a smaller and easier to use contact list, to help you track your customers better and automatically create email marketing campaigns. SoftFuse: In Store Products SoftFuse for Mac offers you a variety of tools to help you capture your customers on the way. You can find them easily with the handy search bar at the top, and choose the one you like the most. But SoftFuse also allows you to choose your contact list manually. You can also search by name, location or date. This is the easiest way to make a contact list for yourself. On the contact list view, you can find your data in four different formats: List view, sorted list, categories view and by group. List view – Here you can edit the name, email address, phone number and other details. You can also add tags to your contacts. Sorted List – You can also sort the contact list by name or email address. This list is very handy as you can see who contacted you first, who contacted you last etc. Categories view – You can also use the categories view to have a more detailed view of your contact list. You can now see which one is the name of your contact, the email address, the phone number etc. By Group – If you group your contacts, you will be able to create a new sub-list per group. You can do this manually, or using tags. You can now find your customers better. SoftFuse: Multi-Contact SoftFuse is also a multi-contact tool, so that you can have multiple contacts on one place. You can import contacts from Facebook, Gmail, Yahoo, LinkedIn, Hotmail, your iPhone, Windows Phone, Windows Desktop, etc. SoftFuse: Contacts and Gmail If you want to import your contacts from Gmail, you can do it easily. All you have to do is click the Import from Gmail button, choose the contacts you want to import, and give the tool access to your Gmail Account. Of course, if you want
